SAGAR DHAGE

Bengaluru, Karnataka, India | 9741479329 | sagardhage9741@gmail.com

Dear Hiring Manager,

I am writing to express my interest in the Product Support Engineer / Software Support Engineer position at your organization. With 4.1 years of experience in Product Support, Software Support, and Customer Support within product-based SaaS companies, I am confident that my technical expertise and customer-centric approach make me a strong fit for your team.

I currently work at VMC Technologies (MCUBE), where I support a SaaS-based cloud telephony platform, troubleshooting product issues, managing incidents through Freshdesk, and collaborating with Product, Engineering, and Implementation teams to ensure timely resolutions for customers across India, the UK, the US, Canada, and the UAE. Previously, at NoBroker, I provided L1/L2 support for SlashRTC, a third-party SaaS communication platform, resolving application, VPN, and user-related issues for end users in India and Dubai using Zendesk.

My experience spans SaaS application support, technical troubleshooting, incident management, customer escalations, and ticket management, along with a strong record of supporting enterprise customers across international markets. I take a structured approach to root cause analysis and enjoy collaborating across teams to resolve issues efficiently while keeping customer satisfaction at the center of every interaction.

I would welcome the opportunity to discuss how my experience aligns with your requirements. Thank you for your time and consideration — I look forward to hearing from you.

Kind regards,
Sagar Dhage

SAGAR DHAGE

Product Support Engineer | SaaS Application Support | Technical Support
Bengaluru, Karnataka, India | 9741479329 | sagardhage9741@gmail.com

PROFESSIONAL SUMMARY

Product Support Engineer with 4.1 years of experience in SaaS application support, technical troubleshooting, incident management, and customer escalations across cloud telephony and communication platforms. PROFESSIONAL EXPERIENCE

Product Support Engineer | May 2024 – Till Date
VMC Technologies Pvt. Ltd. (MCUBE) | SaaS – Cloud Telephony & Customer Communication Platform

- Provide L1 and L2 product support for MCUBE, a SaaS-based cloud telephony and customer communication platform, supporting business customers across India, the UK, the US, Canada, and the UAE.
- Serve as the primary point of contact for customers, resolving product-related queries via phone, email, chat, WhatsApp, and Freshdesk while ensuring SLA compliance.
- Troubleshoot and resolve issues related to IVR, virtual numbers, call routing, call recording, click-to-call, agent login, call logs, user management, CRM integrations, API configurations, and application access.
- Assist customers with product onboarding, account setup, and feature configuration, ensuring successful product adoption.
- Diagnose application issues through log analysis and initial Root Cause Analysis (RCA) before escalating complex cases.
- Coordinate with Product, Development, QA, and Implementation teams to resolve L3 issues and ensure timely ticket closure.
- Log, prioritize, track, and manage incidents using Freshdesk, maintaining accurate documentation and regular customer updates.
- Verify issue resolution after bug fixes and deployments, confirming successful functionality with customers before closing tickets.
- Create and maintain knowledge base articles, troubleshooting guides, and standard operating procedures to improve support efficiency.
- Collaborate with cross-functional teams to identify recurring issues, recommend product improvements, and enhance the overall customer experience.

Software Support Engineer | Oct 2022 – Apr 2024
NoBroker | PropTech (Real Estate Technology) – Third-Party SaaS Platform (SlashRTC)

- Provided L1 and L2 product support for SlashRTC, a third-party SaaS-based cloud communication platform used for voice calling, click-to-call, call routing, call recording, call logs, and business communication.
- Supported end users across India and Dubai (UAE), resolving product and technical issues while ensuring timely service delivery.
- Served as the first point of contact for end users, providing support via phone, email, chat, and Zendesk.
- Troubleshot and resolved issues related to application login, user access, VPN connectivity, application configuration, call quality, call connectivity, softphone functionality, and user permissions.
- Logged, categorized, prioritized, and tracked incidents using Zendesk, ensuring SLA compliance and timely resolution.
- Performed initial troubleshooting and Root Cause Analysis (RCA) to identify issues before escalating complex cases.
- Coordinated with Technology, Product, and Implementation teams to resolve application-related issues and ensure seamless service delivery.
- Escalated unresolved L3 tickets with detailed troubleshooting notes, logs, and supporting information to enable faster resolution.
- Assisted users with application installation, setup, onboarding, account provisioning, and basic product configuration.
- Supported remote users using AnyDesk and other remote support tools to diagnose and resolve application-related issues efficiently.
- Created and maintained accurate documentation of incidents, resolutions, workarounds, and known issues, contributing to the team's knowledge base.
