

SHWETA BIRADAR

SQL Developer | Data Analyst | Database Administrator | Technical Support Engineer

T-SQL | PL/SQL | SQL Server | MySQL | PostgreSQL | Oracle | AWS | Azure | Power BI | SSIS | ETL
Bangalore, Karnataka | +91-7676294009 | biradarshweta48@gmail.com | linkedin.com/in/shweta-biradar-1b5001257 | Immediate Joiner

PROFESSIONAL SUMMARY

SQL Developer, Data Analyst, and Database Administrator with 3+ years of experience in T-SQL, PL/SQL, Advanced SQL, SQL Server administration, query optimization, ETL development, data analysis, and business intelligence. Proficient in Microsoft SQL Server, MySQL, PostgreSQL, Oracle Database, AWS (RDS, S3, Redshift), Azure SQL, Azure Data Factory, and Google BigQuery. Expert in stored procedures, triggers, CTEs, window functions, indexing strategies, execution plan analysis, backup and recovery, data migration, Power BI, DAX, SSRS, and SSIS. Experienced in L1/L2/L3 technical support, incident management, root cause analysis (RCA), SLA compliance, and ITIL-based support processes. Delivered 60% SQL query performance improvement and 40% reduction in manual reporting through automation. Immediate joiner — strong communication, stakeholder management, and Agile/Scrum delivery skills.

TECHNICAL SKILLS

SQL Development: T-SQL, Transact-SQL, PL/SQL, Advanced SQL, CTEs, Window Functions, Stored Procedures, Triggers, Views, Joins, Subqueries, Pivot, Union, Aggregate Functions, Query Optimization

Database Platforms: Microsoft SQL Server 2016/2019/2022, MySQL, PostgreSQL, Oracle Database, SQL Azure, AWS RDS, Amazon Redshift, Google BigQuery, Snowflake

Cloud Platforms: AWS (EC2, RDS, S3, Redshift, Lambda, CloudWatch, Glue, IAM), Microsoft Azure (Azure SQL, Azure Data Factory, Blob Storage, Azure Monitor, Azure DevOps, Azure AD), Google Cloud (BigQuery, GCS)

Database Administration: SQL Server Administration, Index Management (Clustered, Non-Clustered, Composite), Execution Plan Analysis, Backup and Recovery, Data Migration, Performance Tuning, Database Security, RBAC, User Access Management, Database Monitoring, Failover, High Availability, Disaster Recovery (HA/DR)

Technical Support: L1/L2/L3 Technical Support, Incident Management, Root Cause Analysis (RCA), SLA Compliance, OLA, MTTR, ITIL Framework, Escalation Management, Change Management, On-call Support, Production Issue Resolution, Runbooks, SOPs

Monitoring and Alerting: AWS CloudWatch, Azure Monitor, SQL Server Agent Alerts, Performance Monitoring, Log Analysis, Health Dashboards, Proactive Alerting, Capacity Planning

ETL and Integration: SSIS, SQL Agent Jobs, Power Query, Azure Data Factory (ADF), AWS Glue, REST API Integration, Data Transformation, Data Validation, Data Cleansing, Incremental Load, Full Load, Change Data Capture (CDC)

BI and Reporting: Power BI Desktop, Power BI Service, DAX, KPI Dashboards, Row-Level Security (RLS), SSRS, Oracle BI, Data Visualization, Self-Service Analytics

Data Modeling: Star Schema, Snowflake Schema, Fact and Dimension Tables, ERD, OLAP, OLTP, Data Warehousing, Data Governance, Slowly Changing Dimensions (SCD) Type 1 and Type 2

Tools: SSMS, SQL Profiler, Azure Data Studio, DBeaver, pgAdmin, Oracle SQL Developer, MySQL Workbench, ServiceNow, Jira, Confluence, Git, GitHub, Azure DevOps

Programming: Python (Pandas, NumPy, psycopg2, SQLAlchemy, Boto3), Bash Scripting, PowerShell basics, Advanced Excel (Pivot Tables, XLOOKUP, Power Pivot), VBA

WORK EXPERIENCE

SQL Developer | Data Analyst | Technical Support Engineer | Wildfox Business Advocacy | Bangalore, Karnataka

June 2023 – March 2026 (3 Years) • Full-time • Immediate Joiner

Technical Support and Incident Management

- Provided L1/L2/L3 technical support for database, cloud, and application incidents — managed end-to-end triage, root cause analysis (RCA), resolution, and post-incident review achieving 98% SLA compliance and 50% MTTR reduction.
- Resolved critical production issues including query timeouts, deadlocks, blocking sessions, index fragmentation, and disk space alerts using SQL Profiler, wait stats analysis, and execution plan diagnostics.
- Created and maintained runbooks, SOPs, and Confluence knowledge base articles for recurring incidents — reduced repeat incident response time by 35% and improved first-call resolution rate significantly.
- Monitored database and cloud infrastructure health using SQL Server Agent alerts, AWS CloudWatch, Azure Monitor, and custom SSRS dashboards — proactively identified and resolved performance bottlenecks before business impact.

Cloud Infrastructure Support — AWS, Azure, and GCP

- Supported AWS cloud infrastructure (EC2, RDS, S3, Redshift, Lambda, CloudWatch, IAM) — monitored service health, responded to CloudWatch alarms, and resolved cloud-layer incidents with minimal downtime.
- Assisted migration of on-premise SQL Server databases to Azure SQL Managed Instance and AWS RDS using Azure DMS — executed schema validation, data reconciliation, cutover planning, and post-migration UAT.

SQL Development and Database Administration

- Developed and optimized complex T-SQL and PL/SQL queries — CTEs, window functions, stored procedures, triggers, views — for analytical and operational reporting, achieving 60% improvement in query execution performance.
- Administered SQL Server 2016/2019/2022 environments including user access management, RBAC, database security, index maintenance, health checks, backup and recovery, failover testing via SSMS and SQL Profiler.

ETL Automation and Business Intelligence

- Built automated ETL pipelines using SSIS, Power Query, and SQL stored procedures; reduced manual reporting effort by 40% with same-day automated data processing and embedded data validation checks.
- Developed interactive Power BI dashboards with DAX measures, KPI scorecards, and Row-Level Security (RLS) — adopted company-wide for weekly and monthly strategic reporting by senior leadership.

KEY PROJECTS

1. Cloud Database Migration — On-Premise to Azure SQL and AWS RDS

- Migrated SQL Server databases to Azure SQL Managed Instance using Azure Database Migration Service (DMS) — schema validation, data reconciliation, cutover planning, zero-downtime go-live; established CloudWatch and Azure Monitor post-migration alerting.
- Configured AWS RDS (PostgreSQL) with automated backups, Multi-AZ failover, parameter groups, and CloudWatch alarms; documented end-to-end runbooks and conducted post-migration UAT with stakeholders — 99.9% uptime achieved.

2. Automated ETL Pipeline and SQL Reporting Framework

- Designed automated ETL framework using SSIS packages, SQL Agent jobs, CDC patterns, and incremental loads — reduced reporting cycle from 3 days to same-day delivery with 100% data accuracy and zero manual intervention.
- Integrated AWS S3 as staging layer with Lambda-triggered batch loads to Amazon Redshift; implemented CloudWatch dashboards for real-time pipeline monitoring — reduced infrastructure cost by 20%.

3. Enterprise Sales Analytics — SQL Server, Azure Data Factory, and Power BI

- Built end-to-end BI solution integrating MySQL with Power BI Service via Azure Data Factory; optimized T-SQL queries and DAX KPIs (Revenue Growth %, Profit Margin, YoY, MoM analysis) adopted company-wide.
- Designed normalized Star Schema reducing Power BI dashboard load time by 45%; configured RLS aligned to Active Directory groups; optimized 15+ queries via composite indexing — 60% performance improvement.

EDUCATION

B.E. – Computer Science and Engineering | Bheemanna Khandre Institute of Technology | 2022

CERTIFICATIONS

- **HackerRank SQL Certification (Advanced)** — HackerRank
- Java Full Stack Developer Certification — JSpiders, Bangalore
- AWS Cloud Practitioner (CLF-C02) — In Progress
- Microsoft Azure Fundamentals (AZ-900) — In Progress

KEY ACHIEVEMENTS

- **60% SQL query performance improvement via T-SQL optimization, composite indexing, and execution plan analysis across SQL Server, MySQL, and Amazon Redshift production databases.**
- 98% SLA compliance and 50% MTTR reduction through structured L1/L2/L3 incident management, RCA, runbooks, and proactive monitoring across AWS, Azure, and SQL Server environments.
- 40% reduction in manual reporting effort through fully automated SSIS ETL pipelines and SQL stored procedures delivering same-day reports with zero human intervention.

CORE COMPETENCIES AND ATS KEYWORDS

SQL Developer • Data Analyst • Database Administrator • Technical Support Engineer • Cloud Support • L1 Support • L2 Support • L3 Support • Incident Management • Root Cause Analysis • RCA • SLA Compliance • MTTR • ITIL • Change Management • ServiceNow • Escalation Management • Runbooks • SOPs • AWS • Amazon RDS • Amazon S3 • Amazon Redshift • AWS Lambda • AWS CloudWatch • AWS Glue • Microsoft Azure • Azure SQL • Azure Data Factory • Azure Monitor • Azure DevOps • Azure Active Directory • Google Cloud • Google BigQuery • T-SQL • PL/SQL • Stored Procedures • Window Functions • CTEs • SQL Server • MySQL • PostgreSQL • Oracle • Snowflake • Query Optimization • Execution Plan Analysis • Index Management • Backup and Recovery • High Availability • Disaster Recovery • HA/DR • Multi-AZ • Failover • Data Migration • Performance Tuning • ETL • SSIS • Azure Data Factory • CDC • Incremental Load • Data Validation • Data Governance • Power BI • DAX • SSRS • KPI Dashboards • Row-Level Security • Star Schema • Data Warehousing • OLAP • OLTP • SCD • Python • Pandas • Boto3 • Bash • Git • Jira • Confluence • Agile • Scrum • UAT Testing • Stakeholder Management • Immediate Joiner
